

# Rocky Mountain Woodturning Symposium

## 2-Day Workshop with Mark Gardner

**Topic:** Hollow Form & Surface Treatment

**Date:** September 18-19, 2023, 8am - 5pm

**Cost:** \$475/person

**Skill Level:** Some turning experience, comfortable using/sharpening a bowl gouge.

**Location:** Allen Jensen's Shop

6235 N County Rd 13 Loveland, CO 80538

### Details:

Turn hollow forms without hollowing through a small opening and learn surface embellishing techniques. In this class students will first learn techniques that allow you to cut a piece in half, hollow each half and then glue the halves back together, using green wood. This eliminates the challenge of hollowing a piece through a small opening. The second half of the class will cover many of the surface embellishing techniques that I've used over the years, including power carving, engraving, wire brushing, dying and painting using milk paints. Students should have some basic turning experience and be comfortable using and sharpening a bowl gouge.

A list of recommended tools and materials will be emailed to participants approximately 1 month prior to the workshop.

**Cancellation Policy:** If your workshop registration is cancelled by August 15, you will receive a refund minus a \$60 cancellation fee. After August 19, no refund will be given.
